25X1

25X1 the attached plan of Minsk (27°35'E/53°50'N), White Russian SSR.

25X1 Comment:

The sketch is of particular value as the various industrial objects were not entered in the previously available town plans of Minsk. All the essential plants on which reports were already transmitted are recorded correctly.

The eastern section of the sketch with the tractor plant and the airfield is slightly out of line. The railroad line to Moscow actually runs more to the northeast and the entire block around the tractor plant, including the railroad line, must be shifted further to the south to bring it closer to the road to Mogilev.

The entrance of a new ball-bearing plant under construction is of particular interest.
